EDUCATION

VIT Bhopal University

June 2022

Current GPA: 8.22/10

B.Tech Computer Science

Maheshwari Public School (12th)

-2022

Percentage: 85%

Sagar Public School (10th)

2020

Percentage: 91%

SKILLS

Languages: Java, Python, C, JavaScript/TypeScript, HTML/CSS,

Tools: Git, GitHub, VS Code, IntelliJ IDEA, PyCharm, MySQL Workbench, AWS Console, Kubernetes, Docker, Gradle, Linux

PROJECTS

PeerLink [↗] | *Java, Maven, AWS Lightsail, Docker, Nginx, Shell, JUnit*

May 2025 – June 2025

- Developed RESTful backend API using Java with custom HTTP server implementation and Maven dependency management
- Implemented containerization using Docker and Docker Compose with Nginx reverse proxy configuration for optimized performance
- Deployed live application on AWS Lightsail with custom domain and automated shell scripting, implementing JUnit testing framework with 90% test coverage

CrossWise | *TypeScript, JavaScript, Generative AI APIs (Chatbot), AWS, REST APIs*

Sept. 2024 – Jan. 2025

- Team project for the Amazon Sambhav Hackathon 2024 Hackathon (Finalist)
- Led development of a GenAI chatbot using Python and AWS services to automate responses to export-related inquiries, including regulations and documentation; reduced manual processing time by 35%.
- Reduced customer service dependency by 30% through a GenAI chatbot that addressed export regulation FAQs with 95% accuracy, significantly improving operational efficiency.
- Implemented DAP/DDP pricing models for transparent international shipment costing, reducing shipping cost inquiries by 30%

TrainEase | *Java, Gradle, Swing, Jackson (JSON), BCrypt, JavaTimeModule, Git, IntelliJ IDEA*

Dec. 2024 - Jan. 2025

- Constructed a Java-based train booking application with JSON (Jackson) storage and MVC design, enabling filtering, cancellation, and history features; achieving a 99.9
- Engineered a Java Swing train booking application featuring real-time seat selection and secure login via BCrypt, processing 50+ bookings daily with zero security breaches, enhancing user trust.
- Boosted UX and stability using JavaTimeModule, structured logging, and modular OOP principles

EXPERIENCE

MSVO Venture Pvt. Ltd. | *Agritech Startup*

Oct. 2024 – Jan. 2025

Engineered an automated risk detection module leveraging Java and Spring Boot, cutting false positives by 15% and amplifying detection accuracy; this resulted in savings of at least 10 weekly manual hours.

Revamped key APIs via strategic PostgreSQL query indexing and restructuring, achieving a 33% reduction in average response time, from 2.1 to 1.4 seconds; the team identified the 3 biggest bottlenecks.

CERTIFICATION

Cloud Computing | *NPTEL*

Supervised Machine Learning: Regression and Classification | *Stanford Online*

AWS Solutions Architect - Associate | *Ethnus*

ACHIEVEMENTS

- Finalist (Top 12 out of 1 Lakh+ teams) in **Amazon Sambhav Hackathon 2024** for CrossWise project.
